Subject: Microsoft Settlement

Dear Sir(s),

it is great to know that the DoJ has agreed upon a settlement with Microsoft. I am not only a law student, but have been using Microsoft MSDOS since 1986 on an IBM 8088 PC. i know that all the products are not perfect but Microsoft does come up with excellent programs such as Word 97 and Win 95. it would indeed be an overkill to see the company broken up simply because their OS outsold those of others. My fullest support for Microsoft!!
